A European owned and managed company, Domino Tiles Ltd has become one of the leading specialists in volume export of porcelain and ceramic tiles as well as glass, stone and metal mosaics out of China. Each year, we now export over 450,000m² of product to clients in the USA, Canada, Turkey, New Zealand and throughout the EU.

Our high purchasing power and our locally-based team with unparalleled experience and contact-base in China ensure that even the highest-quality products from market-leading manufacturers are sourced at the most competitive prices. This is reflected in the lowest prices being offered to our clients. We have also negotiated market exclusivity deals on several trend-setting products in order to protect our customers' business.

The production process is overseen on the ground by our designated quality control team. Domino personnel carry out routine quality-testing at all of our partners' factories out of our base in Guangdong, China. We understand the difficulties inherent in dealing with foreign factories directly – language and cultural barriers, lead times, restrictive payment terms. Domino is able to negotiate such problems on behalf of its clients, handling deposits and financing shipment in order to ensure a smooth delivery process. We also keep our own stocks for customers in our Chinese production base.
